

GAF-Certainteed Company Asbestos Dump

June 2, 1980

Mr. Murray Sherman
Plant Manager
GAF Corporation
9215 Riverview Drive
St. Louis, Missouri 63137

Dear Mr. Sherman:

This is to advise that we have completed our staff review of the project to stabilize the asbestos waste pile located at the GAF Corporation plant site in St. Louis County, Missouri.

The results of our latest inspection of the site conducted on May 13, 1980 confirm that the project has been completed in basic conformance with the approved plans and specifications as prepared by the consultant, Reitz & Jens, Inc. The inspector was satisfied that the necessary work has been accomplished in terms of the specified grading, covering and vegetative growth establishment provisions, as well as installation of the stream bank rip-rap and storm water drainage appurtenances. Verification of the closure plat to be filed with the County Recorder of Deeds Office has also been received in this office.

Based upon these determinations, it is our judgement that the GAF Corporation has taken the necessary actions to stabilize the asbestos waste pile and thereby restore the site to a condition in which it no longer poses a threat of contamination to the water or air resources of the state.

We again thank GAF Corporation personnel for their cooperation in resolving this matter in good order.

Sincerely,

Earl F. Holtgraewe, P.E.

Subject:

MYLAR PLATS -- LOCATION OF SECURED ASBESTOS-CEMENT WASTE PILE -- ST. LOUIS

Per our discussion of this morning, we are enclosing two Mylar plat transparencies of a survey conducted by our Consulting Engineers, Reitz & Jens, Inc.

The survey was requested by the state and federal regulatory agencies to place the location of our secured asbestos-cement waste pile on our property.

Please have these signed by the appropriate corporate personnel and then return them to me at:

GAF Corporation
9215 Riverview Drive
St. Louis, Missouri 63137
Attn. Mr. M. S. Sherman

for submission to the city and county recorder.

We were advised that the person signing the drawings should also have his name printed under the signature.

M. S. Sherman
